## ABOUT PRONTO POOLS

Pronto Pools, our swimming pool design company was established by a team of experienced pool construction professionals specialized in design and installation of concrete tiled swimming pools. C.E.O Rtn. Mr. Krishnaraj, a highly respected member of the industry for over 20 years has been the name behind the installation of quality swimming pools across India. We have a team of CAD draftsmen and 3-D animation artists who can make your pool come alive before even a single shovel of earth is taken out of the ground. You can look at a few examples of these illustrations on the gallery page. We provide pool design services to architects, private clients, hotels, leisure centres, schools as well as other swimming pool construction companies. Quite a large percentage of our work is repeat business. We like to think this is a fair indication of customer satisfaction and strive to maintain and enhance our reputation at all times. We supply and install pool

equipment, undertake plumbing and electrical installation, and execute the whole project on a turnkey basis-the choice is yours, but we will always give you an unbiased advice and try to find the most suitable and economically viable solution according to your needs.

Our range of services include:

- Supply of Steam Bath Sauna
- Supply of Jacuzzi and Chilled Shower
- Supply of Children's Playground equipment
- Installation of modular toilet partitions
- Supply and installation of pool fencing

Pronto Pools, more than just a residential pool builder, also specializes in commercial swimming facilities. We ensure that all the details in the sports facility swimming pool are according to FINA regulations.

## 7 GOOD REASON YOU SHOULD CHOOSE PRONTO

Through our customer-focus, expert advice, and personal approach, Pronto has grown to become one of the leading suppliers in the swimming pool sector. Seven key reasons you should choose Pronto as your reliable swimming pool partner are:

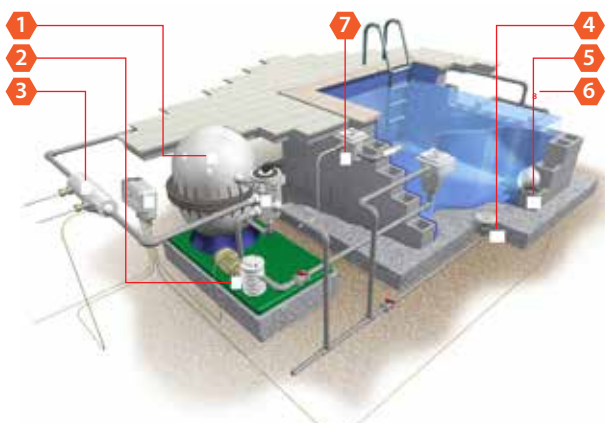

Over 20 years of unmatched service and has installed a huge number of swimming pools in India.

# DESIGN PHILOSOPHY OF SWIMMING POOL

Swimming pools have been in use for decades and continue to be a wonderful relaxation and entertainment value addition of private and public leisure complexes. Modern swimming pools are becoming ever more sophisticated and the systems that support them need to keep up. It is no longer enough to source the best available components and put them together in a plant room. The system needs to be compatible and that's where our swimming pool design comes into the picture.

## SKIMMER SYSTEM

Water is removed from the pool via a skimmer which has a flap lid that positions itself according to the surface of the water. The water is then taken to the filtration plant, purified, and fresh water is circulated into the pool.

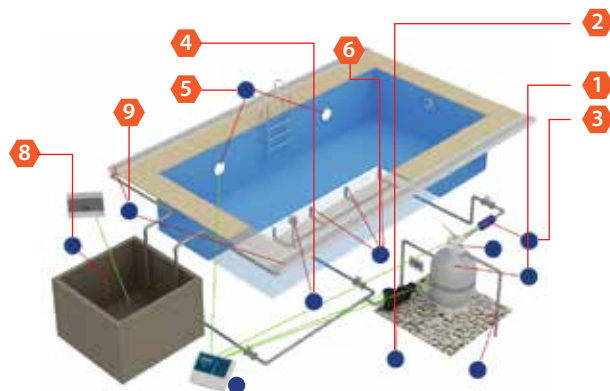

- 1 Filter
- 2 Pump
- 3 Heater
- 4 Main Drain
- 5 Underwater Light
- 6 Inlets
- 7 Skimmer
- 8 Balancing Tank
- 9 Deck Drain

## DECK DRAIN SYSTEM

Deck drain system provides an effective drainage system for concrete pools. In this system, the overflowing water collected on the drains is taken to the balancing tank. The filtration plant takes the turbid water from the balancing tank, purifies it, and circulates it into the via inlet nozzles.

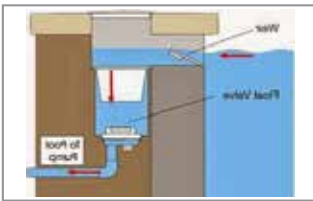

### PIPELESS FILTER

This can be used for indoor swimming pools as the space area is small and fixing a filtration plant would be a constraint. This type is recommended for pools with lesser area space.

## SKIMMER SYSTEM POOL

## DECK DRAIN POOL

## INFINITY POOL
